Efficient Hygienic Solutions to Keep Production Moving

MOVING MATERIALS THAT MATTER.

Do not let your manufacturing lines stop unplanned

Downtime

Automating processes can reduce the risk of unexpected downtime due to manual errors, inefficiencies, and staffing shortages.

Hygiene

Salmonella and listeria represent almost 40% of all food product recalls. Having the right equipment that is FDA compliant and minimizing manual interactions within your process can help protect your company from this risk.

Equipment Maintenance

Over half of industrial equipment failures occur due to improper lubrication maintenance. Automatic lubricators ensure your equipment receives the right amount of lubrication on a consistent basis to help prevent unforeseen breakdowns.

PRODUCT HIGHLIGHT: SANIFORCE® UNLOADERS

Need to transfer 1,000,000 cps materials? No problem!

Graco's SaniForce unloaders can evacuate medium to high viscosity products from their original 55-gallon (200 litres) or 300-gallon (1000 litres) containers, without diluting the material. Remove the food and work safety issues associated with manual scooping.

PRODUCT HIGHLIGHT: INVISIPAC®

Eliminate adhesive char and improve line efficiency with InvisiPac melt-on-demand adhesive dispense for case and carton sealing.

Tank-Free™ hot melt delivery outperforms tank and tankless melters, making end-of-line packaging more cost-effective and safer.

esi

Are you missing out on potential profit?

Improving efficiency is key to reducing overhead expenses, achieving a higher ROI, and it can deliver a competitive advantage over the competition. Graco solutions can help you achieve improved efficiencies through minimizing equipment downtime, more accurate throughput and reduced waste.

PRODUCT HIGHLIGHT: QUANTM™

The QUANTM electric double diaphragm (EODD) pumps cut energy usage by up to 80% compared to pneumatic pumps. Integrated controls allow users to adjust flow and pressure at the pump and provide an I/O for remote operation and integration into current control system.

PRODUCT HIGHLIGHT: G3® MAX GEN 2

Extend machinery life, reduce operating costs, and increase productivity with the G3 Max Gen 2 automatic lubrication pump.

Built for demanding lubrication applications, this durable and reliable pump handles changing temperatures and challenging grease types with ease.

Sanitary Piston Pumps

- Ingredient transfer and supply of low to high-viscosity materials.
- Available in 3 different lengths to suit varied container types
- Features quick-knockdown lowers made of corrosion-resistant stainless steel and an easily washable, FDA-compliant shroud

Melt-On-Demand Adhesive Dispense

- Eliminates adhesive char, increasing productivity
- Prevents pop-opens with consistent adhesive delivery
- Improves safety by removing burn hazard risks

Drum/Bin Unloader

- Ingredient unloading from pail, drum or bin into mixing tanks
- Evacuate high viscosity materials of 1,000,000 cps and eliminate need for dilution or heating of product
- Multiple configuration options to meet your technical requirements

Diaphragm Pumps

- FDA compliant transfer pumps for moving product through the assembly line
- Pneumatic and electric options deliver low cost of operation
- Flow rates up to 230 gpm and particles up to 3.8 inches

Automatic Lubrication

- Industry-leading solutions for lubricating industrial machines
- Lubricate any type of machine and conveyors
- Reduces maintenance and labor requirements, minimizes machine downtime for service
